EGS

TITLE: Geological Charts

SOURCE: Soviet Union (USSR), no. 197, 1966, p. 51. (Verbatim)

After nearly 20 years of work Estonian scientist Ralph Mannil has completed geological charts of the extensive territory of the Baltic-Scandinavian basin. As a description of the history of the basin through the whole mineral-forming era there, the charts are a significant contribution to science. Ralph Mannil received important data for the charts from Valdar Janusson, a Swedish colleague.
